Nume	Unitate
Lățimea de lucru	1500 mm
Greutate	1500 kg
Presiunea uleiului	200-350 bar
Fluxul de ulei	160-180 l/min
Diametrul maxim copac	30 cm
Număr de ciocane	30 pcs

Descriere

The FW fixed (hammer) forestry head is designed to crush branches, trees, stumps and tree remains from felling. It is equipped with special hammers with hard metal tips, which are more resistant and durable. The construction of the rotor with perfect electronic balancing allows excellent crushing. The monoblock chassis system together with the skids for height adjustment. Reinforced and adjustable system allows to work in different heights. The opening gate system can be mounted mechanically or hydraulically. The construction is extremely solid and robust.

- Monohull chassis in anti-wear steel plate.
- Widia hammer rotor shaft.
- Skids for height adjustment.
- Piston hydraulic motor.
- Motor safety valve.
- Transmission by pulleys and belts.
- Front and rear anti-projection chains.
- Back door can be open.
- Crushing capacity up to Ø 30cm.m.
